

INDUCTION HOBS - INTUITIVE SLIDER

Smeg has been producing domestic appliances with the finest Italian design for more than 70 years, with a particular focus on aesthetics, ergonomics and functionality.

Today Smeg, originally an acronym for Smalterie Metallurgiche Emiliane Guastalla indicating its initial activities in enamel work and metallurgy, has reached its third generation of entrepreneurs and represents an international group with direct subsidiaries and distributors in all five continents.

Made in Italy

# INDUCTION HOBS

## *Technology meets cooking*

Sleek, elegant lines which integrate perfectly into the worktop – Smeg's hobs are the ideal solution for those who love a minimalist, contemporary style, where the hob is the perfect continuation of the worktop.

## **INTUITIVE SLIDER CONTROLS**

The induction hob features elegant, grey screen-printed slider controls which allow intuitive use of the hob for greater versatility of use.

## **NEW GLASS FINISH**

Smeg's hobs are available with front bevel for semi-flush installation, while some versions offer straight edges to allow installation completely flush with the worktop.

# TECHNOLOGY MEETS COOKING

## 14 LEVELS OF COOKING

The different levels of cooking ensure maximum flexibility of use, providing you with greater precision and temperature control when cooking all types of meals.

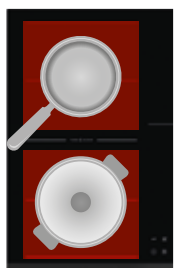

## POWER BOOSTER ON ALL ZONES

Allows you to use maximum power on all cooking zones for foods requiring particularly intense cooking.

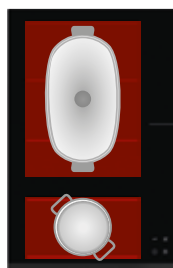

## MULTIZONE

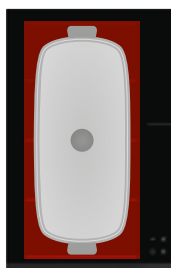

This function allows you to combine multiple cooking zones to create a single larger one. This function connects two cooking zones, which operate like a single zone.

Standard zone

Big zone

Max zone

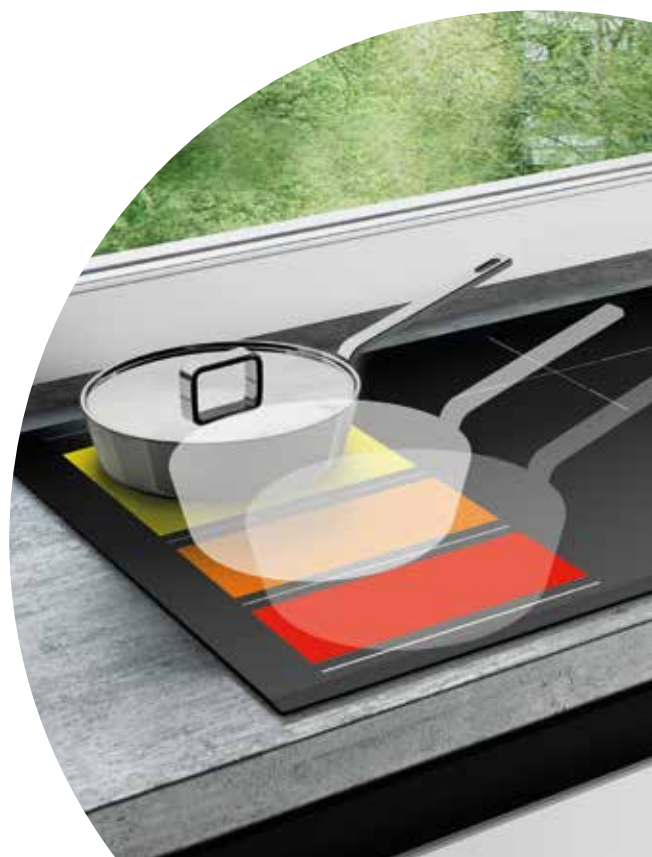

## FLEXI4ZONE

This function allows you to use multiple pans of various dimensions (minimum diameter 10 cm) at the same time, increasing flexibility of positioning.

## FLEXI-HEAT

This function allows you to move pans between three preset temperature zones, to quickly heat (high temperature), cook (medium temperature) or keep foodstuffs warm (minimum temperature), without the need to raise or lower the temperature – simply move pans between the three zones, as required. The preset power levels can also be modified.

# COOKING **FLEXIBILITY**

## PERFECT-HEAT

This function allows you to keep the temperature of the pan constant during cooking without having to manually adjust the power level on the hob. Ideal for keeping food warm, but also for keeping temperatures constant during more intensive cooking, particularly frying.

## TIMER

The hob's timer is independent for each zone, and is able to operate both as a progressive counter and as a countdown timer to meet different cooking requirements. It provides an audible notification when the set time has elapsed.

## PAUSE

Ideal for putting cooking on hold and resuming with the previously selected settings when required.

## INTELLIGENT INSTALLATION

- No need for front carcass cut-outs for ventilation
- Pre-installed brackets, seal and cable
- Can be installed into worktops of just 12 mm with drawer underneath

# MAXIMUM EFFICIENCY

## ECO-LOGIC

This option allows you to limit the hob's power draw. You can select one of ten preset power values, ranging from 1.5 kW to 7.2 kW in 0.5 kW increments, and the hob will then intelligently distribute the selected power level between all cooking zones.

## ECO-HEAT

This function warns when the zone is still hot after being switched off. As well as ensuring maximum safety by preventing burns, this also allows you to make use of residual heat to continue cooking or keep foods hot.

**continue  
cooking**

**keep  
warm**

**residual  
heat**

## ECO-OFF

This energy-saving function shuts the zone down before the timer sounds, making use of the residual heat in the pan.

# CONNECTED HOBS AND HOODS

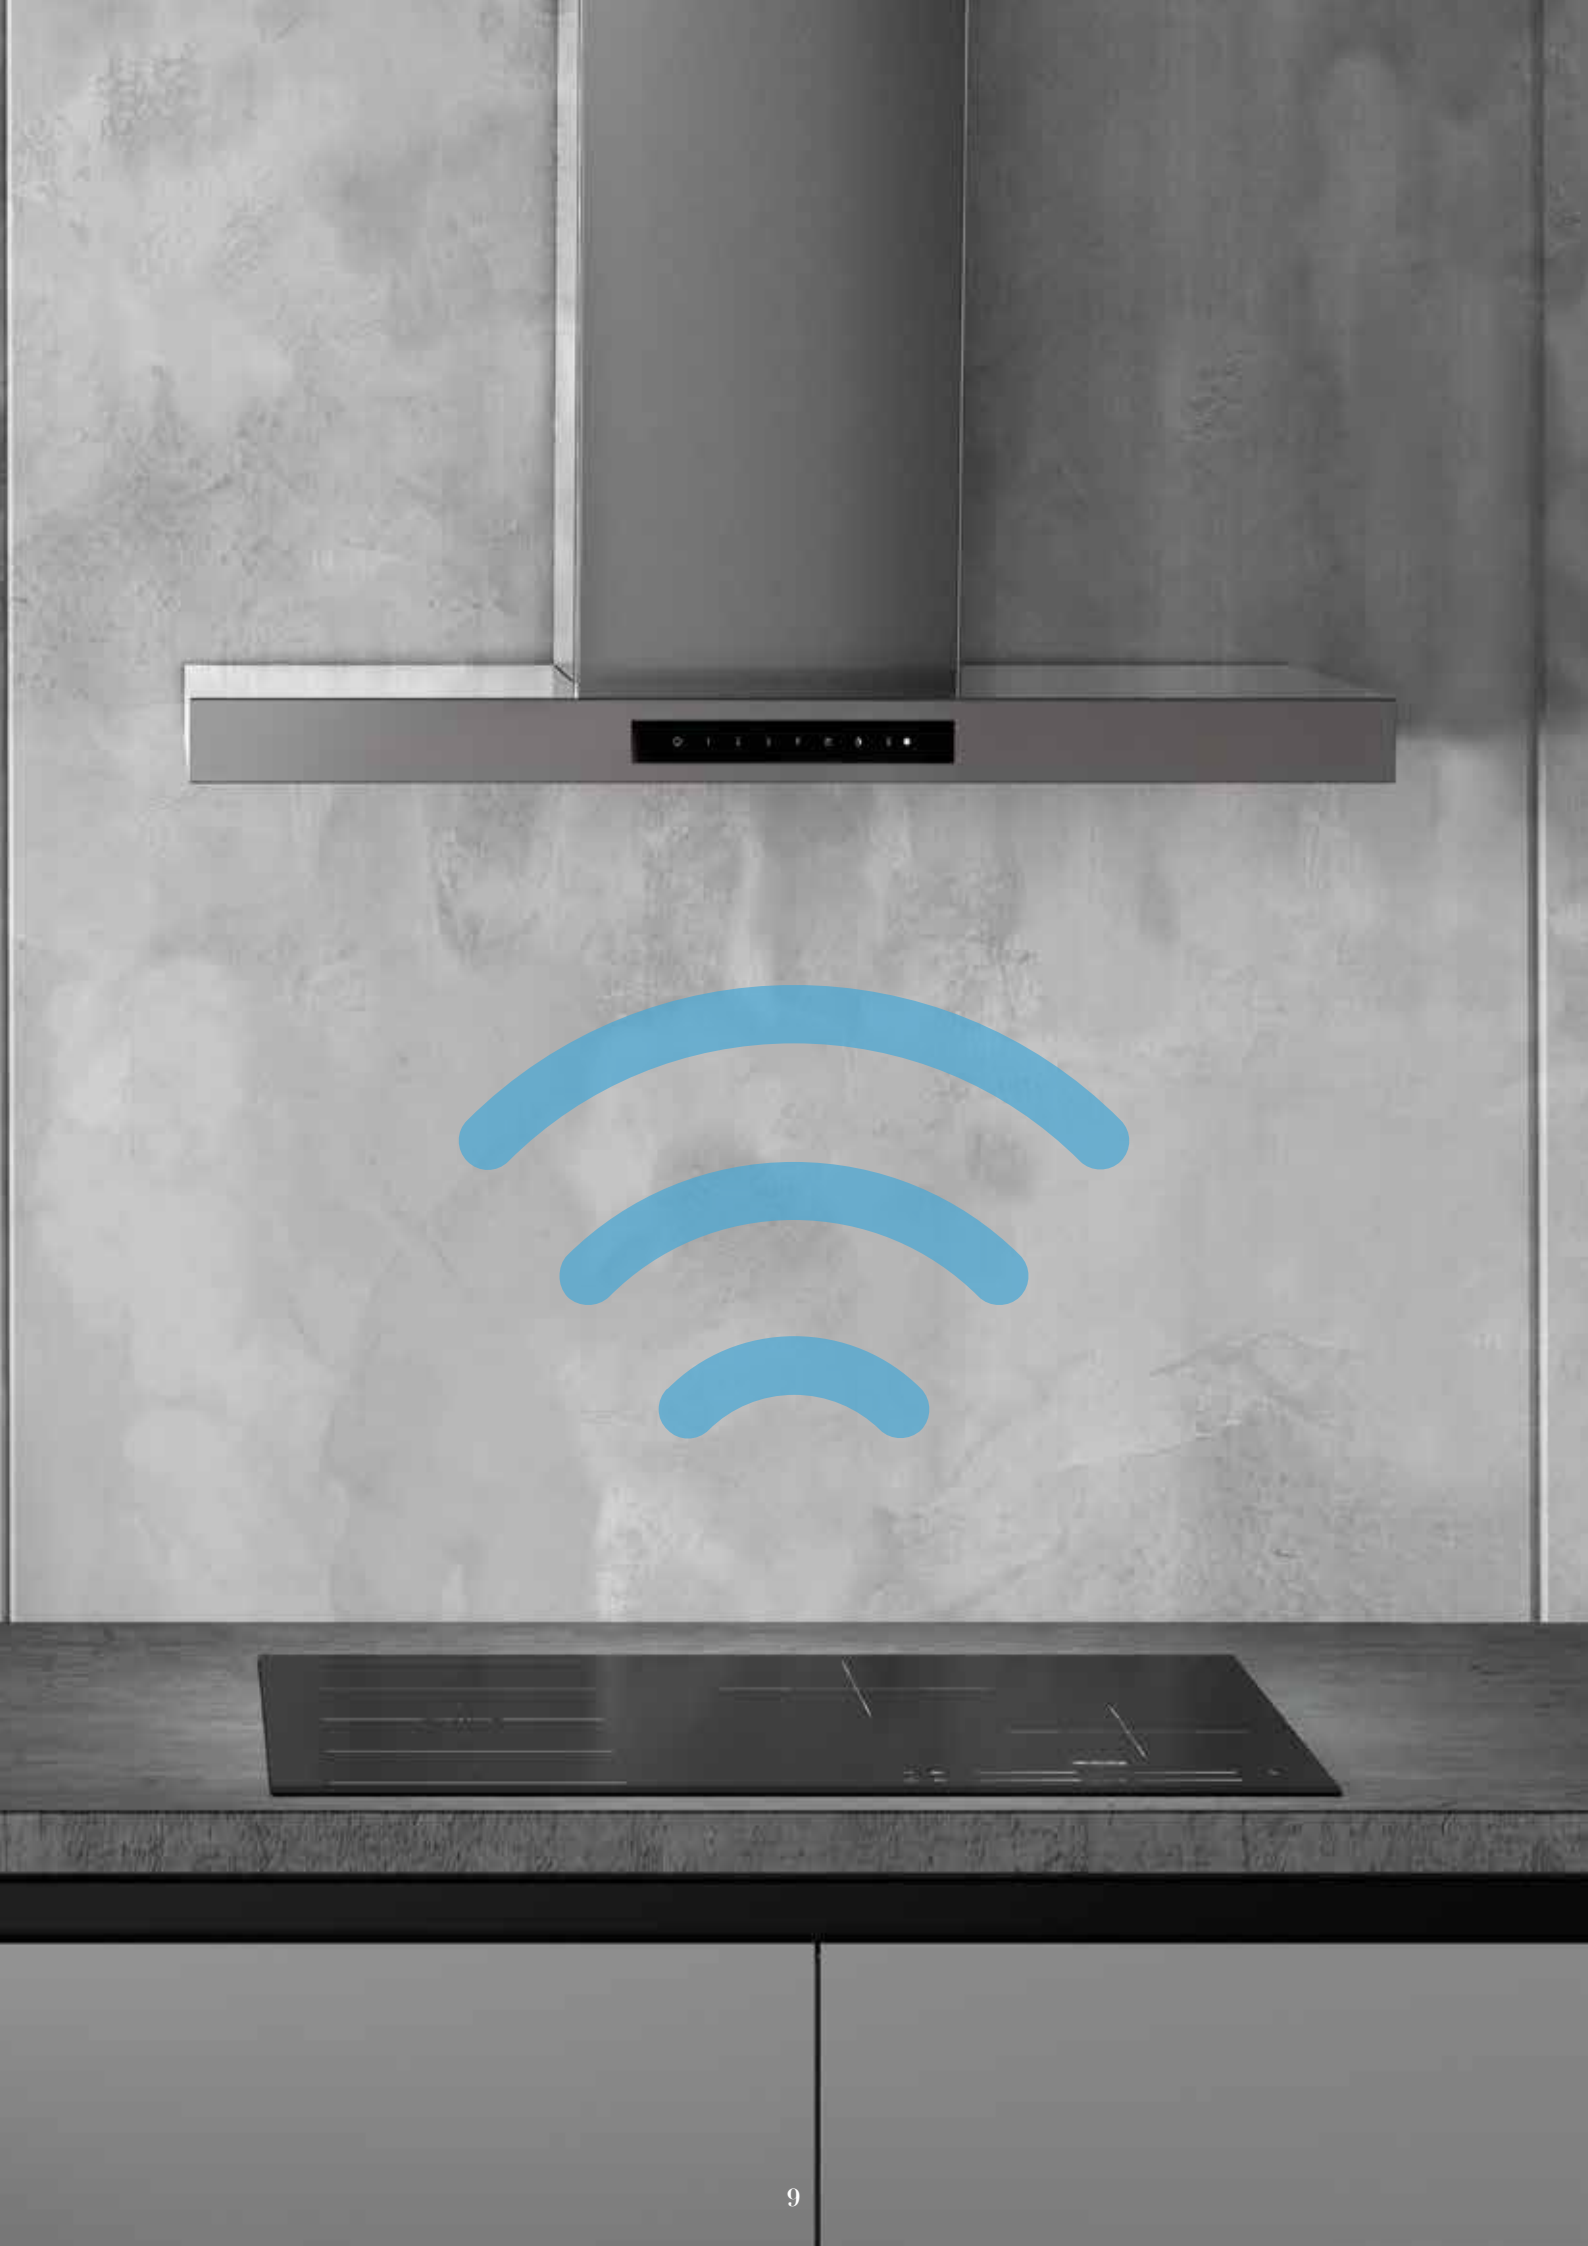

## AUTO-VENT

This function automatically regulates the hood extraction speed depending on the temperature and power level selected on the hob.

It is therefore no longer necessary to manually adjust the settings of the cooker hood – simply use the hob as required, and the cooker hood will automatically adjust its extraction speed to match the hob settings.

Up to six preset programs can be selected. It is also possible to manually adjust the hood from the hob simply by touching the Auto-Vent button.

## SIH7933B

HOB, 90 CM, INDUCTION, UNIVERSAL, BLACK

### PLUS:

Auto-Vent function  
Ultra-low profile installation  
3 induction cooking zones  
3 booster cooking zones  
1st zone booster power: 3200 W  
2nd zone booster power: 3200 W  
3rd zone booster power: 3200 W  
1.5 power levels  
Levels quick setting  
Automatic pan diameter adjustment  
Pan detection  
Automatic switch off when overheat  
Automatic switch off when overflow  
Ceramic glass  
Frontal controls  
Controls lock/Child safety

Voltage (V): 220-240 V  
Voltage 2 (V): 400 V  
Frequency (Hz): 50/60 Hz  
Electrical connection rating (W): 6800 W

## SI1F7955B

HOB, 90 CM, INDUCTION, UNIVERSAL, BLACK

### PLUS:

Auto-Vent function  
Flexi4Zone  
Flexi-Heat  
Ultra-low profile installation  
5 induction cooking zones  
5 booster cooking zones  
1st zone booster power: 3200 W  
Rear left: Ø 22 cm, 2300 W, 3200 W  
2nd zone booster power: 3200 W  
3rd zone booster power: 3500/3700 W  
Front right: Ø 14.5 cm, 1400 W, 2500 W  
4th zone booster power: 2500 W  
Rear right: Ø 21 cm, 2300 W, 3200 W  
5th zone booster power: 3200 W  
1.5 power levels
